| <u>Crack Repair Options:</u> | <u>Average Cost:</u> | <u>Expected Life of Crack Repair:</u> | <u>Cost Savings using ARMOR®:</u> |
|-------------------------------------|-----------------------------|--|--|
| Crack Filler or Caulk | \$3,500 | Less than 1 year | \$0** |
| Fiberglass Fabric | \$4,000 | Less than 1 year | \$500 |
| ARMOR® Crack Repair | \$6,500 | 10 years | n/a |
| Infrared Patch | \$7,500 | Less than 1 year | \$4,000 |
| Saw-cut & Patch | \$8,500 | Less than 1 year | \$5,000 |
| 2" Asphalt Overlay | \$12,000 | Less than 1 year | \$8,500 |
| Petro-Tac & Asphalt | \$15,000 | 5 years | \$9,500 |
| Stone Dust Overlay | \$24,000 | 5 years | \$18,500 |
| Prefabricated Mat | \$24,000 | 25 years | \$17,500 |
| Total Reconstuction | \$30,000 | 5 - 10 years (?) | \$23,500 |

() Savings calculated over a 7 year period at which time the court will need to be resurfaced (color coated). An assumption was made and a cost was added for having to fill the cracks each year after the repairs initially fail.*

*(**) Remember to consider the yearly appearance of cracks and the unsightly appearance of temporary crack filler when choosing this option.*
